Slides with `minideck`

Some examples

John Doe

rust-gpu setup

- cargo install cargo-gpu
- set up shader crate
  - defines data for sharing between main and GPU
- set up caller crate
-
- install vulkan https://vulkan.lunarg.com/sdk/home#mac?

export VULKAN_SDK=/Users/cristina/VulkanSDK/1.4.363.0
export MOLTENVK_ICD=/Users/cristina/VulkanSDK/1.4.363.0/macOS/share/vulkan/icd.d/MoltenVK_icd.json export MOLTENVK_LIB=/Users/cristina/VulkanSDK/1.4.363.0/macOS/lib

platforms

- WebGPU (not actually for web, more like OpenGL)
- Cuda
- Vulkan
- Metal
- RocM HIP

Render shaders

Render pipeline

vertex shaders transform vertices

fragment shaders transform pixels

SDKs

- RustGPU

Compute shaders

memory in

apply transformations

memory out

SDKs

- RustGPU
- cuda-rs
- cubecl
